

Cloud-Based Digital Workplaces

Technology moves fast and as a result most workplaces have communication and collaboration solutions growing out their ears. If you're looking to consolidate sprawling IT systems and applications in your organisation, or if you're looking for the best way to start off your business on the right foot, then Storm can help you make the right choices and make it happen.

KEY CHALLENGES

- How do I get my users to collaborate more effectively?
- How do I provide my users with everything they need to work effectively from any location, but still maintain security?
- How do I get my documents, apps and data onto the cloud?
- Do I need to train my staff again after migrating to the cloud?

We're experts in designing and building secure and cost effective cloud-based digital workplace solutions. Leveraging SharePoint, Office 365 and Azure as platforms to consolidate your company's applications, documents and other information in one central location - accessible to your users no matter where they are in the world - will have a positive impact on your business and your users.

Working directly with you, we help you capitalise on the opportunities the cloud offers. By moving to a cloud-based digital workplace infrastructure you'll be able to:

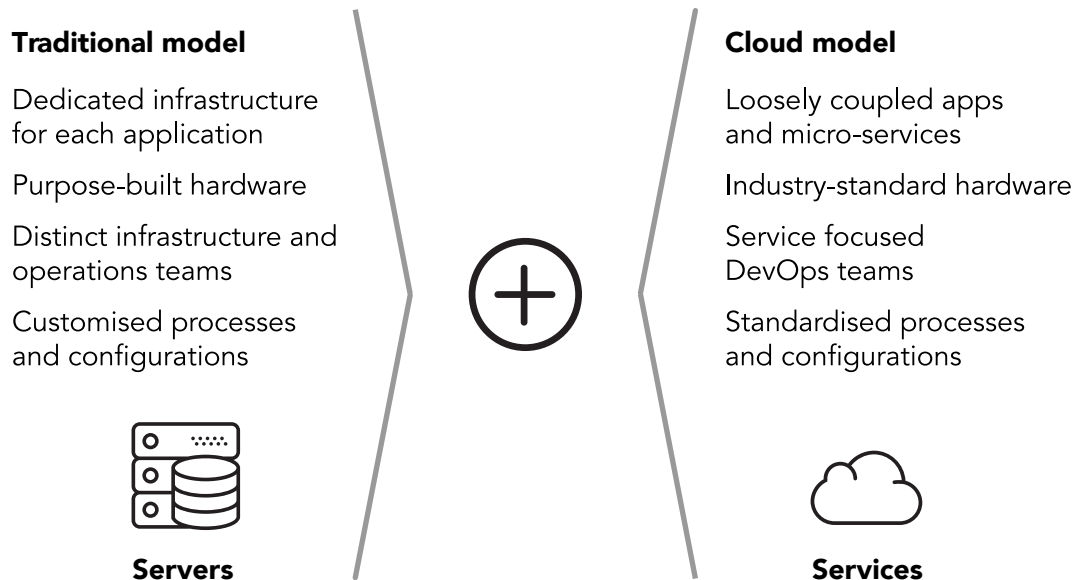

- Save your business money
- Keep your data secure
- Improve the ease of access to your data

INFRASTRUCTURE MODERNISATION

The world of traditional IT is under pressure to add agility, cut costs and to do more with their limited resources. Businesses need flexible infrastructure that can scale on demand. Hybrid cloud lets you seamlessly extend applications and data to the cloud and provides additional

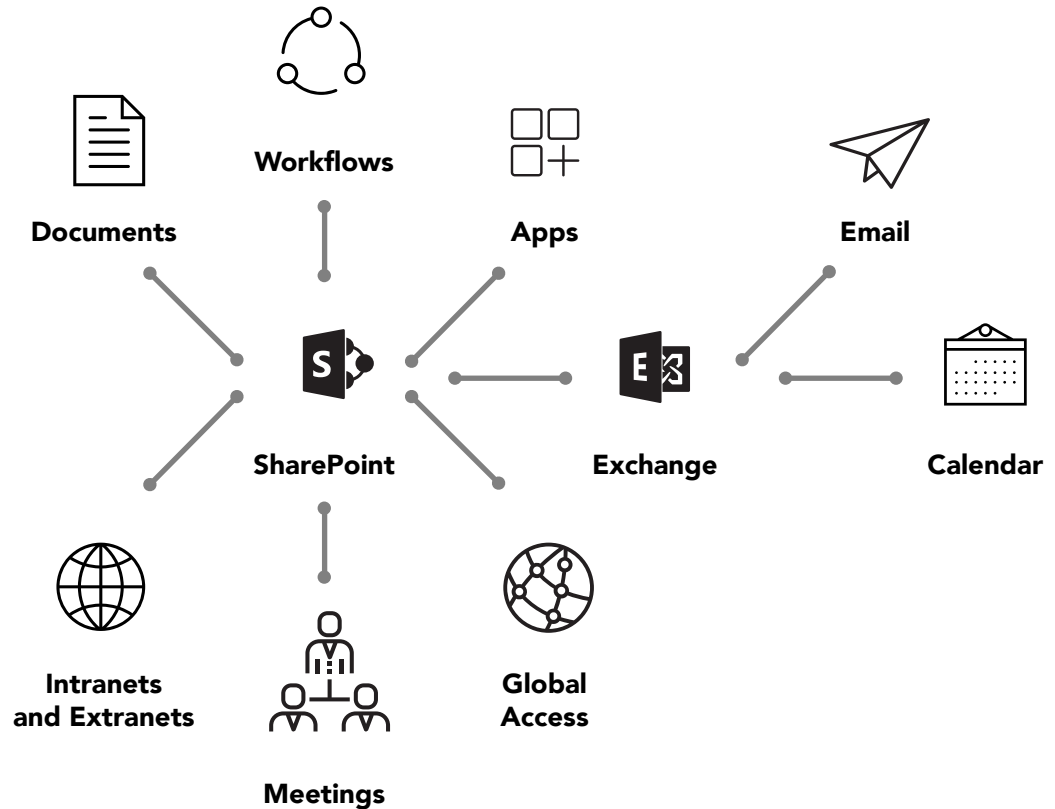

IT resources whenever needed, allowing IT teams to keep pace with changing business requirements.

SharePoint, Office 365 and Azure are ideal platforms on which to build cloud-based workplaces, and can seamlessly integrate with your on-premises infrastructure to provide a truly hybrid solution, allowing you to stage your migration to the cloud.

INCREASED AND IMPROVED COLLABORATION

In world of 24/7 access from anywhere business, you need to know that your users are able to access the applications and information they need, no matter what the time of day or their geographic location, and no matter where those apps and information are hosted. With our cloud-based workplaces, you can access internal sites, applications, documents, and other information from anywhere - at the office, at home, or from a mobile device - creating a secure and convenient go-to destination for your users, without the hassle of VPN or other remote access solutions.

INCREASED SECURITY AND REDUCED RISK

Cyber security continues to be a key issue for all organisations and we know that your data is your most valuable business asset. That's why all our cloud solutions come with inbuilt security and privacy. We partner with Microsoft so that we can offer our clients world-class cloud infrastructure, guaranteed SLAs and 24/7 monitoring and alerts.

Cloud IT also exists across many secure and resilient data centres so, unlike traditional 'on premise' IT, your data is at less risk from fire, theft and vandalism.
