

Carbon Reduction Plan

Supplier name: Storm ID Ltd

Publication date: 19th June 2025

Commitment to achieving Net Zero

Storm ID Ltd is committed to achieving Net Zero emissions by 2045, in line with Scottish Government policy. With further work and new insights, we hope to exceed this target.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019-20	
Additional Details relating to the Baseline Emissions calculations.	
Historic baseline providing initial set of results on commencement of carbon emissions monitoring within the business and at introduction of reduction initiatives which were put in place to drive improvements within the business.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	2.09
Scope 2	70.05
Scope 3 (Included Sources)	24.58 96.72
Total Emissions	96.72

Current Emissions Reporting

Reporting Year: 2024- 25 (Our reporting period begins in April and ends in March the following year, in line with the financial year.)	
EMISSIONS	TOTAL (tCO₂e) 0.88
Scope 1	0.88
Scope 2	48.41
Scope 3 (Included Sources)	5.98
Total Emissions	55.27

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We initially projected that carbon emissions would decrease over the five years from 2019 to **70.0 tCO₂e by 2024-25 reporting**. This would have represented a reduction of **28%** against the 2019 Baseline Carbon Emissions Report 96.72tCO₂e. By implementing the various carbon reduction initiatives our most recent report shows we have already achieved a reduction of **43%**.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or continued in the 24/25 year. The carbon emission reduction achieved by these schemes equate to **41.45 tCO₂e**, a **43%** reduction against the **2019** baseline and the measures will be in effect when performing the contract.

- (Ongoing) Flexible new working arrangements continue to provide less energy consumables and consumption equating a reduction in deliveries and transportation.
- Adoption of additional LED lighting throughout the office continued at the end of current useful life again this will continue in 2025/2026;
- (Ongoing) Supply chain audit: Due diligence with regards to environmental sustainability and carbon reduction will be performed on each of our suppliers, specifically looking to support local businesses and businesses actively reducing their carbon emissions. This is an ongoing review.
- (Ongoing) Sustainability policy development and implementation. Periodically reviewing sustainability policies and strategy, working to complete expected objects within the projected time frame.
- Tracking office attendance has shown an 85% reduction in office attendance due to hybrid working arrangements and this figure is now used to approximate other emissions accounting.
- Upgraded commercial boilers & plant room continue to provide more efficient systems, this resulted in a reduction year on year in energy usage.

- Initiatives undertaken to monitor, quantify, and reduce carbon emissions have yielded a 11% decrease in total tCO₂e emissions for the reporting period.
- Working towards ISO14001:2025 revision certification

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

A handwritten signature in blue ink that reads "T. Threlfall". The signature is stylized with a large, sweeping flourish at the end.

Tim Threlfall

Operations Director
